

CEMBRE PRODUCTS

MSGW/MSGW-E1
MECHANICAL STRAIGHTENING
DEVICE

The mechanical straightening device for profiled contact wires enables easy, continuous straightening of common wire sizes, including 100, 120, 150 mm² / 185 mm², and larger.

AD-GWL / HC-GW
SUPPORT DEVICE / HANDLE
CLAMP

The AD-GWL aligns and straightens shaped copper overhead line contact wires, providing fast, efficient in-line preparation for full traction joints. It is supplied complete with the HC-GW contact wire clamp.

B500ND-TFC
BATTERY HYDRAULIC CUTTING
TOOL

This cordless hydraulic cutting tool is designed for cutting shaped copper contact wires used in overhead lines. It provides clean, perpendicular cuts without deforming the wire profile, making it ideal for installing full traction joints. Available with a Metabo (B500ND-TFCA) battery and compatible with Milwaukee (B500NDW-TFC-WCB) batteries.

B70M-P36R
PORTABLE BATTERY-POWERED
ELECTRO-HYDRAULIC PUMP

Designed for fully autonomous operation, this unit generates pressure up to 700 bar, with safe pressure release at any time via the dedicated control. Its two-speed hydraulic system optimizes performance, ensuring faster and more efficient operations. **(VARIOUS MODELS AVAILABLE)**
