

## IMPORTANT NOTE

### RB2SPD Instructions:

93-1005 RB2SPD is designed to work with both **Black Twister** 150 RPM and **Carbide Twister** 350 RPM, please ensure you utilize your Twister Bits with the correct speed.

When cutting, it is imperative to use **concentrated cutting fluid**.

Please fill the concentrate fluid until the top of the feet of the coolant bottle and the remainder with **RV Antifreeze** in the winter or water in the summer. Shake well.

Do not use **windshield washer fluid** as it contains alcohol and will **deteriorate** internal o-rings, seals and grease within the drill.
